

I am writing in reference to future of FM translator stations. Many people (as do I) listen to K-LOVE on FM translators. I do not want to lose the ability to hear the type of uplifting non commercial programming provided by K-LOVE. I am a listener and financial supporter of KLOVE, and would be very disappointed if they were required to give up their translator for a LPFM broadcaster of another type programming.

My son is two, and he listens to K-LOVE with us (he even sings along), and I do not need to worry about what he will hear. I could not say that of most of the commercial 'drive1' being sent over the airwaves now, My family listens to K-LOVE, and as I get the opportunity to introduce them to it, so do my friends.

It is refreshing to be a able listen to positive messages without hearing 'fart jokes' and other racist, improper, humilitating or derogertory radio. It is a genuine public service provided by K-LOVE and it would be a shame to lose it.
